

**OPERATING PROCEDURE IN CASE OF SUSPECTED SARS-CoV-2 INFECTION IN
WUST DORMITORIES**

1. In the event of experiencing symptoms suggesting COVID-19 infection, a student / doctoral student / guest accommodated in the guest room should stay in their room, inform the head of the dormitory (via phone or e-mail) and contact the primary care physician by phone. In case of health deterioration, they should call 999 or 112 and let the services know they may be infected with the coronavirus.
2. The Housing Department, after receiving information about suspected infection, directs the student / doctoral student / guest to the quarantine room or instructs them to self-isolate in the room they are currently occupying. Afterwards, they inform the Health and Safety and Fire Protection Department (+48 71 320 25 81 or by e-mail: bhp@pwr.edu.pl) and the Dean's Office of the relevant Faculty / Doctoral School about this fact.
3. A person suspected of being infected is obliged to immediately create a list of people they have had contact with at the University and a list of full-time classes in which they participated (within the last 10 days).
4. The Health and Safety and Fire Protection Department, on the basis of the contact list, will get in touch with the relevant Deans' Offices and provide them with the necessary information and guidelines.
5. People who have had contact with a person suspected of being infected should self-isolate until further guidelines are available, introduce self-monitoring of their health, and in the event of noticing symptoms of COVID-19, immediately contact a primary care physician / ambulance station / sanitary-epidemiological station, and notify the head of the dormitory.
6. People who have had contact with a person diagnosed with COVID-19 should contact the sanitary-epidemiological station and, until further instructions are available, self-isolate and conduct self-monitoring of their health. In the event of noticing symptoms of COVID-19, they should immediately contact a primary care physician / ambulance station / sanitary-epidemiological station and notify the head of the dormitory / reception desk by phone.
7. Individuals subject to quarantine or isolation should be provided with the basic daily necessities and meals by an external catering company(for a fee), according to the rules established by the management of the Housing Department.
8. Common rooms previously used by a person under quarantine or isolation, should be closed first and immediately disinfected before they are allowed to be used again by other residents of the dormitory.
9. The isolation room where the person under quarantine or isolation had stayed should be disinfected after they have vacated it.
10. After the quarantine period, the room in which the person was housed is considered "clean" and may be used again.
11. People from one outbreak of infection can be isolated in one module, provided they receive separate single rooms.
12. In the case of minors, the head of the dormitory is obliged to contact their legal guardians.
